PROFESSIONAL PROFILE

First-year Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning, with a strong interest in developing intelligent systems and exploring emerging AI technologies. Focused on Machine Learning, Deep Learning, Neural Networks, and Large Language Models, with an emphasis on their practical applications. Experienced in developing AI-driven projects involving document analysis, conversational systems, and automated resume evaluation. Committed to continuous learning, technical exploration, and applying theoretical concepts to practical challenges. Actively engages in collaborative projects and hackathons to strengthen problem-solving and engineering skills. Aspires to contribute to impactful AI/ML solutions that address real-world problems.

TECHNICAL SKILLS

Programming: Python, C++ fundamentals, SQL basics

AI / LLM Applications: RAG concepts, prompt-based LLM integration, Embeddings and Vector search concepts, API integration

Libraries / Frameworks: NumPy, Streamlit, LangChain, FAISS, PyPDF2, exposure to Pandas and SciKit-Learn

Web / Data: HTML, CSS, JavaScript fundamentals, MySQL, Supabase

Tools: VS Code, Git, GitHub, Google Colab

PROJECT EXPERIENCE

1. AI Playground — RAG PDF Analyzer, Multi Model ChatBot

Tech Stack: Python, Streamlit, LangChain, FAISS, Gemini API, OpenRouter

Developed a PDF question-answering application using RAG.

Integrated multiple LLM APIs for document analysis and conversational responses.

2. TeamForge — AI-Powered Collaboration Platform

Tech Stack: HTML, CSS, JavaScript, Supabase, Vercel, AI/ML APIs

Designed a platform for team formation, developer discovery, and collaboration.

Planned AI-based skill matching and project idea generation.

3. MFX — Multi-Currency Converter

Tech Stack: HTML, CSS, JavaScript, Chart.js, Frankfurter API

Built a currency converter with live exchange rates and interactive charts.

Added favourites, recent conversions, and browser-based data storage.

TECHNICAL & COLLABORATIVE EXPERIENCE

FinTech Centre of Excellence (CoE) - CIT: Working on an AI-based credit risk assessment prototype with a focus on explainability.

GDG on Campus - CIT: Selected member, attended DevFest by Google Developer Groups, Chennai.

TeamForge: Collaborating on a platform concept for team formation, developer discovery, and AI-assisted skill matching for ORION AI Innovation Awards.

Athera, Technical Club - CIT: Club Member, Participating in technical hackathons and collaborative problem-solving activities. Collaborating with peers to develop project ideas and strengthen technical skills.

COURSES & PROFESSIONAL DEVELOPMENT

Claude 101 (Anthropic) — Generative AI fundamentals.

Introduction to Generative AI (Google Cloud) — Generative AI concepts.

Intro to Machine Learning (Kaggle) — Machine learning fundamentals.

Introduction to Large Language Models (IBM) — Coursework in Large Language Models (LLMs) and their applications.

C++ Certification / Course — C++ programming fundamentals.

EDUCATION

B.E. Computer Science & Engineering (AIML) | **Chennai Institute of Technology, Chennai**

Expected graduation: 2030

Higher Secondary Education: Ebenezer Marcus International School & Jr College
